

AC INPUT LED DRIVER

交流電壓 LED 驅動器

Input Data:(left side: orange or white or other same color lines)

AC Input Range : 90~264Vac

AC Inrush Current : Cold Start 10A/220V

Driver Data:(right side: Red to LED “+” ;Black to LED “-”)

Min. LED series Voltage Vomin=: 20V

MAX. LED series Voltage Vomax=: 45V

EX: LED Vf=3.5/each, Vin=220V,

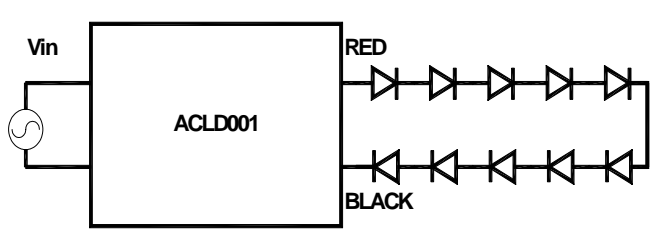

Min. LED series number=20/3.5=6

MAX. LED series number=45/3.5=12 pcs.

LED driver Current :

Part No.	Current (mA)
ACLD001A-0	20
ACLD001B-0	50
ACLD001C-0	150
ACLD001D-0	350
ACLD001E-0	700

Application Wiring diagram

NOTE :

1. Our product is been qualified by our QA system, we offer 3 months guarantee period after shipping. It supplies only under the right application of the user, We make no assurance while improper operation.
2. Do not series LED over than SPEC. shown.
3. Do not power on this driver before check the whole wiring diagram. Be careful of the output non-isolated voltage with input voltage.
